

Z-SERIES

METAL 1 HOUR FIRE RATED HINGED LOFT ACCESS DOORS

(PREVIOUSLY KNOWN AS 1160 & 1161)

DATASHEET

High performance metal loft access doors with 1 hour fire protection

Use

- To provide access through the ceiling into the ceiling void in situations where fire protection is required.

Features & Benefits

- Compliant with NHBC standards for minimum access opening of 520mm.
- Purpose made product with proven performance.
- Superior to site fabricated panels.
- Provides up to 60 minutes fire protection.
- Excellent aesthetic appearance and factory finished.
- Maintenance free, no need to paint.
- Allows the use of a telescopic ladder if required.
- Incorporates secure twist operated catch assembly.
- Acoustic performance of 29dB.
- U value 0.82 W/m²K and 0.35W/m²K options available.
- Budget lock and key lock options available.

Quality

- Independently fire tested.
- Complies with Building Regulations document L1A & L2A (2013 Edition).
- Meets all relevant British Standards and NHBC requirements.

Material & Colour

- Frame & door fabricated in 1mm & 1.2mm Zintec electro-galvanised mild steel.
- The door is lined with a fire resistant sub-panel to enhance fire resistance and stability.
- Polyester powder coating, lightly textured.
- Door and frame available in white only RAL 9010.

Key Lock

Technical Information

- Timloc loft access doors contain glass wool insulation with a Thermal Conductivity of 0.037W/mK. For this reason a correction. U value of 0.004W/m²K should be calculated to the proposed U value figures for a ceiling (U value for a ceiling, not to exceed 0.16W/m²K).
- With reference to insulation, the products in this range do not use, contain or produce CFC's, ie. HCFC's & HFA's. The mineral wool insulation relies on entrapped air for its thermal properties; air is not a VOC and it does not have Global Warming Potential (GWP) or Ozone Depletion Potential (ODP).

Installation Advice

- The Z8003 and Z8004 are designed to fit between trussed rafters or ceiling joists spaced at 600mm centres which provide a clear joist opening width of 562mm to be plasterboard lined to give 542mm
- If the joist spacing does not provide this opening width, a suitable trimmed opening must be formed
- It is essential that trimmers are installed between the ceiling joists across the ends of the frame
- The frame fixes with screws into the ceiling joists at the sides of the frame, and through the ends of the frame into the trimmers
- If timber is used to trim the structural opening, then a layer of plasterboard or other proprietary material must be used to protect the timber

Product Codes

Metal 1 Hour Fire Rated Hinged Loft Access Doors

Product Codes	Description	Frame Fitting Size	Clear Opening Size	Overall Panel & Frame Size	Insulation U-value	Lead Time
Z8003	Z-Series Fire Rated Metal Loft Door 542x630mm	542 x 630mm	520 x 580mm	590 x 680mm	0.82 W/m²K	Next working day
Z8004	Z-Series Fire Rated Metal Loft Door 542x745mm	542 x 745mm	520 x 695mm	590 x 795mm	0.82 W/m²K	Next working day
