

Z-SERIES

METAL ACCESS PANELS DATASHEET

Metal access panels for access to mechanical, electrical and other building services

Use

- Provides access to services and connections behind dry lined walls, ducts and ceilings.
- For applications where plastic access panels are not suitable and a fire rating is not required.
- Ideal solution for meeting Part J and the gas safety industry's concealed boiler flue inspection access requirements (non-fire rated applications).

Features & Benefits

- Purpose made product saves time and money compared with traditional joiner-made access doors.
- Excellent aesthetic appearance and finish.
- Flush fitting door panels.
- Visible picture frame surround smartly conceals cut out edges and contributes to a faster installation.
- Smooth and enduring polyester powder coated finish.
- Allows for painting if required.
- Quick and straight forward to install.
- 50mm deep frame for deeper wall and ceiling fixing.
- Hinged door panel with budget lock.

Quality

- Helps to meet Building Regulation Document Part J – Concealed Flues in Voids (2010 edition).

Material & Colour

- Electro galvanised mild steel.
- Polyester powder coated smooth finish 20% gloss.
- White – RAL 9010.

Care and Maintenance

- Clean using a soft cloth with a mild detergent.

How to Order

- State which size of panel is required and confirm the hole cutting size.
