

Hip Trays

Provides a straight and stable platform for hip tiles during installation.

Use

- Most types of slate, concrete or clay hip tiles
- Round or angled hip tiles
- Most pitched roof types from 15-55°
- New build and retro-fit projects

Features and Benefits

- Installs directly over the ridge roll on hip details
- Creates a level, stable base to support tiles along the hip of the roof
- Easily trimmed to the required length
- Simple to shape for the angles needed at the eaves or ridge/hip junction

Quality

- Helping to meet:
 - BS 5534 Code of practice for slating and tiling
 - BS 5250 Code of practice for control of condensation in buildings
- Complies with all other relevant regulations and standards
- Independently tested and complies with BS 8612

Material and Colour

- Recycled PVC
- Black

Installation Advice

- Please refer to timloc.co.uk for recommended installation guidance

How to Order

- To be used in conjunction with the 6m Roll Out Dry Fix Ridge Kit
- Allow for a minimum hip tray overlap of at least 150mm onto the next tray
