

AIRTIGHT PLASTIC ACCESS PANELS

INSTALLATION ADVICE

Fully airtight and high level acoustic performance plastic access panels

Manufactured to BS EN ISO 9001 and BS EN ISO 14001

Helps to meet Building Regulation: Document Part J - Concealed Flues in Voids (2010 edition)

Helps to meet Building Regulation: Document Part E - Resistant to Sound (2003 edition)

Helps to meet Building Regulation: Part L1 and L2 - Conservation of Fuel and Power (2013 edition)

1.

Cut hole to size (see frame fitting size), making sure that it is straight and level.

2.

Apply silicon or other suitable grade building adhesive to the back of the frame.

3.

Press the frame firmly into place, checking it is straight and level.

4.

Do not operate until the adhesive has set completely. Simply push the clip fit door panel into the frame.
