

ROOFLINE

by timloc

EAVES VENT

INSTALLATION ADVICE

Efficient multi-functional ventilation system

-  Satisfies all NHBC requirements
-  Manufactured to BS EN ISO 9001 and BS IN ISO 14001
-  Complies with all relevant Building Regulations
-  Meets all relevant British Standards

1.

Use to ventilate pitched roofs, where the pitch of the roof is 15 degrees or more, and the roof void is attic or loft space.

2.

Make sure each ventilator is fixed securely into the top of the fascia board using screws or nails through the fixing holes provided.

3.

Products designed so that the roofing felt will be cut back flush with the edge of the fascia board, and not dressed out into the gutter.

4.

Ventilation must be provided for the full length of the eaves and along both sides of the building to create a cross flow ventilation action.
