

ELECTRIC METER BOX | RECESSED

INSTALLATION ADVICE

Designed to house UK standard domestic electric meters

-  Satisfies all NHBC requirements
-  Manufactured to BS EN ISO 9001-2015
-  Complies with all relevant Building Regulations
-  Meets all relevant British Standards

1.

This meter box should only be fitted by a suitably qualified person.

2.

Minimum wall cut out of 535mm x 365mm required. Build the box into the wall in the position specified, ensuring it does not bridge the damp proof course.

3.

The base and sides of the box should be fully bedded into the mortar to hold it into the wall with the sides of the architrave touching the outer leaf of the brickwork.

4.

A suitable Timloc cavity tray should be fitted as a damp proof course above and behind the box.

5.

Where a spigot is fitted, build the inner wall around it, filling any space between the spigot and the wall with mortar.
