

INSULATION RETAINING  
DISCS

# INSTALLATION ADVICE

**A universal insulation retaining disc to suit most styles and sizes of wall tie**

-  Manufactured to BS EN ISO 9001 and BS EN ISO 14001
-  Satisfies all NHBC requirements
-  Complies with all relevant Building Regulations
-  Meets all relevant British Standards

- 1.** Insulation retaining discs should be fitted to every wall tie for applications when insulation retainers are required
- 2.** Spacing and quantity calculations should be as wall tie guidance.
- 3.** Consult latest NHBC Standards for required spacing.
- 4.** 'Where partial cavity fill is to be used,' ties/discs should be spaced at 600mm centres horizontally and in vertical as well as horizontal rows, ie not staggered.
- 5.** Retaining discs are clipped onto wall ties either before building in or in situ.
- 6.** Due to the firm grip design the disc may require opening slightly to accept the wall tie.
- 7.** It is recommended that the wall tie is held in position when the disc is offered and clipped in place.
