

Z-SERIES

METAL 1 HOUR FIRE RATED
HINGED LOFT ACCESS DOORS

INSTALLATION ADVICE

High performance metal loft access doors
with 1 hour fire protection

Independently fire tested

Complies with Building Regulations document L1A & L2A (2013 Edition)

Meets all relevant British Standards and NHBC requirements

1.

The Z8003 and Z8004 are designed to fit between trussed rafters or ceiling joists spaced at 600mm centres which provide a clear joist opening width of 562mm to be plasterboard lined to give 542mm.

2.

If the joist spacing does not provide this opening width, a suitable trimmed opening must be formed.

3.

It is essential that trimmers are installed between the ceiling joists across the ends of the frame.

4.

The frame fixes with screws into the ceiling joists at the sides of the frame and through the ends of the frame into the trimmers.

5.

If timber is used to trim the structural opening, then a layer of plasterboard or other proprietary material must be used to protect the timber.
